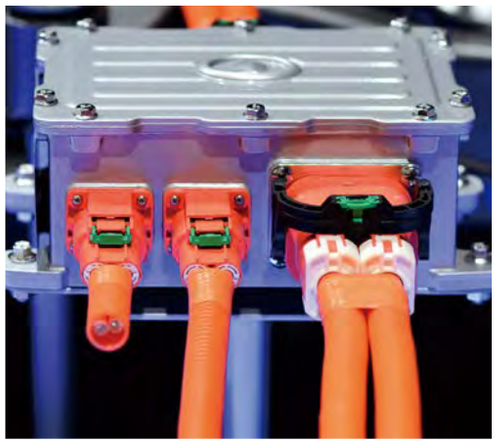
ALTRAN MAGNETICS

DC CONTACTOR DIVISION

Manufacturers of Standard and Custom
DC Contactors

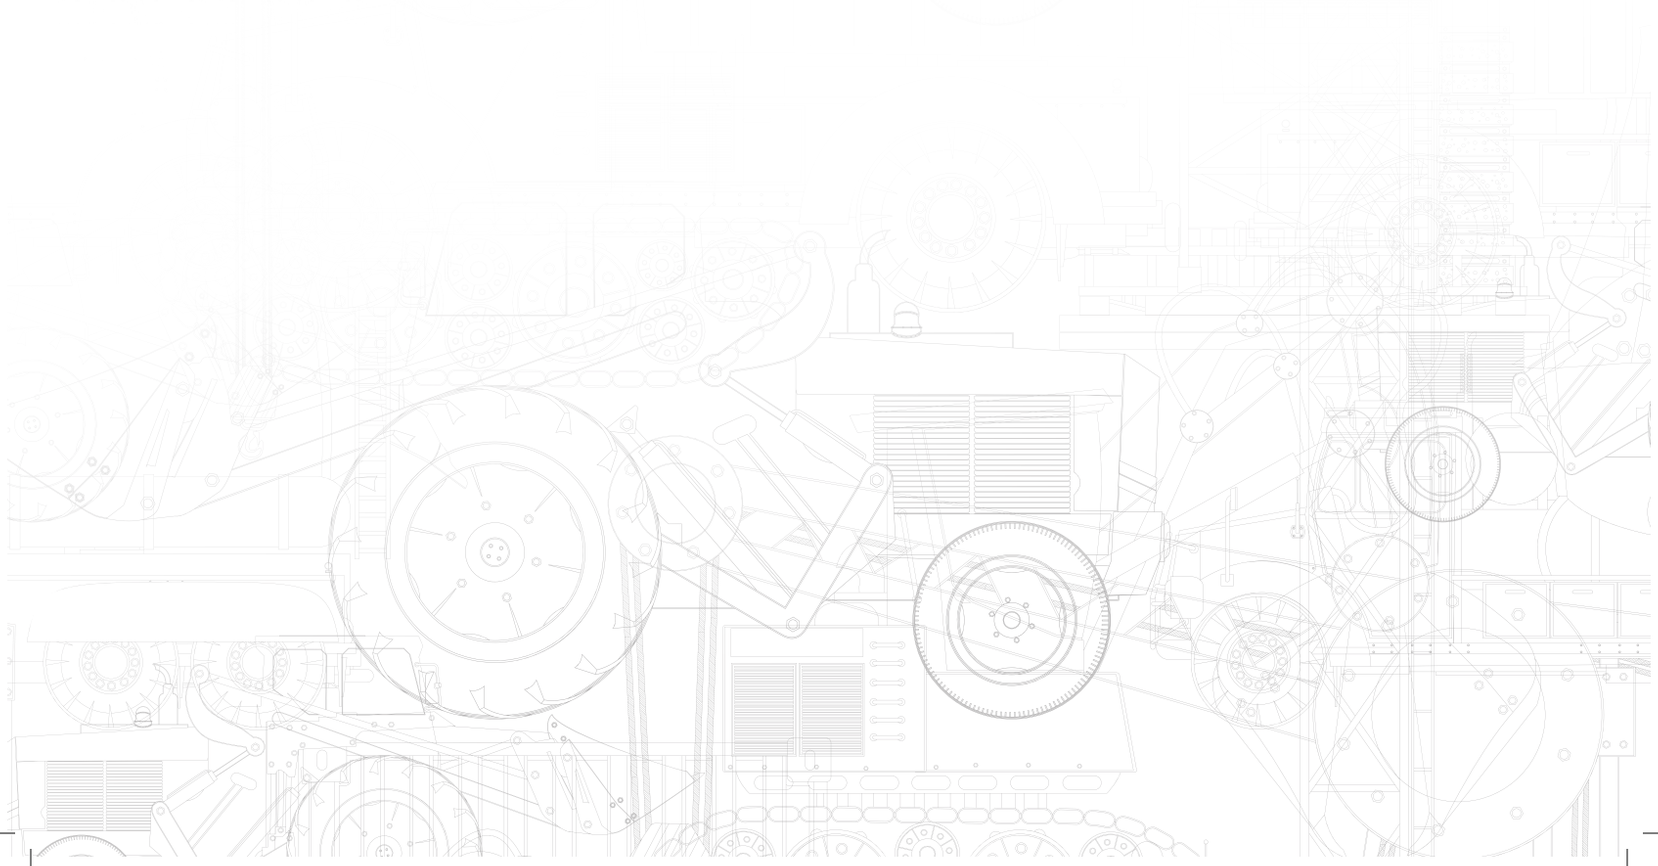


ABOUT US

Altran Magnetics, Inc. is a solution provider of DC Contactors. With around 100 P/N's in our portfolio, we are a leader in DC Contactor technologies ranging from battery management systems to Electric Vehicle power systems. Understanding that every application has its own unique electrical, mechanical and thermal requirements, our global design team can provide products to meet your specific application requirements.

Our Corporate Headquarters in Sterling, Illinois offers centralized customer service, domestic engineering support, and warehousing opportunities. Our 15 years in DC Contactor manufacturing and IATF-16949 / ISO-9001 / ISO14000 approved Shanghai-based manufacturing facilities provide premium quality at market competitive cost structures.

We are an industry-focused, solution-oriented organization producing innovative products in a supportive and progressive environment for our customers, employees and suppliers. Continually seeking new and alternative methods of improving all facets of our business our goal is to become the preeminent supplier of standard and custom products to the leading markets we serve.



DC CONTACTORS

ASEV30 Series DC Contactor Specification

ALTRAN MAGNETICS

Application

1. Power supply / motor control, circuit insulation, circuit protection and safety devices for industrial machinery
2. Charging pill, Electric vehicle etc.

Features

HIGH CURRENT AND HIGH VOLTAGE
Nitrogen sealed contacts to minimize arcing, up to 900VDC load is available.

COMPACT STRUCTURE, LOW NOISE
Contact design yields reduced unit size, low noise while carrying or switching current.

HIGH SAFETY
There is no arc leakage due to tight sealing.

HIGH CONTACT RELIABILITY
Stable contact resistance no matter how harsh the environment with sealed contacts

NO SPECIAL MOUNTING REQUIREMENT
Light weight actuator is less impacted by gravity with no special mounting orientation requirements.

VARIOUS APPLICATIONS
Application includes battery switch and standby equipment, DC power control, circuit protection, etc.

EU ROHS DIRECTIVE (2011/65/EU) COMPLIANT

Performance Data

MAIN CONTACT		LIFE	
Contact arrangement	1 Form X (SPST-NO, DM)	30A @+450VDC (make/break)	10,000 cycles
Rated Operating Voltage	12-900VDC	30A @+750VDC (make/break)	4,000 cycles
Continuous (Carry) Current	30A*1	Mechanical life	200,000 cycles
Short term	50A (3 minutes)*2		
Max short circuit current	1,250A (1/2 cycle, 60Hz) (through closed contacts)		
Dielectric Withstanding Voltage	Between open contacts: 5,600Vrms/8,000Vdc		
	Between contact and coil: 2,200Vrms/4,000Vdc		
Insulation Resistance	Terminal to Terminal/ Terminal to coil		
	New: Min 100 MΩ @500Vdc End of life: Min 50 MΩ @500Vdc		
Voltage Drop (@30A)	≤60mV		
ENVIRONMENTAL DATA		**OPERATE / RELEASE TIME**	
Shock, 11ms ½ sine, operating	20G Peak	Close (includes bounce)	25ms, Max.
Vibration, Sine, Peak, 20G	55—2,000Hz	Release	10ms, Max.
Operating Ambient Temperature	-40 to +85˚C		
Noise (@100mm)	70dB(a)		
Altitude	<4000m		
Weight	0.28 Lb (0.13 kg)		

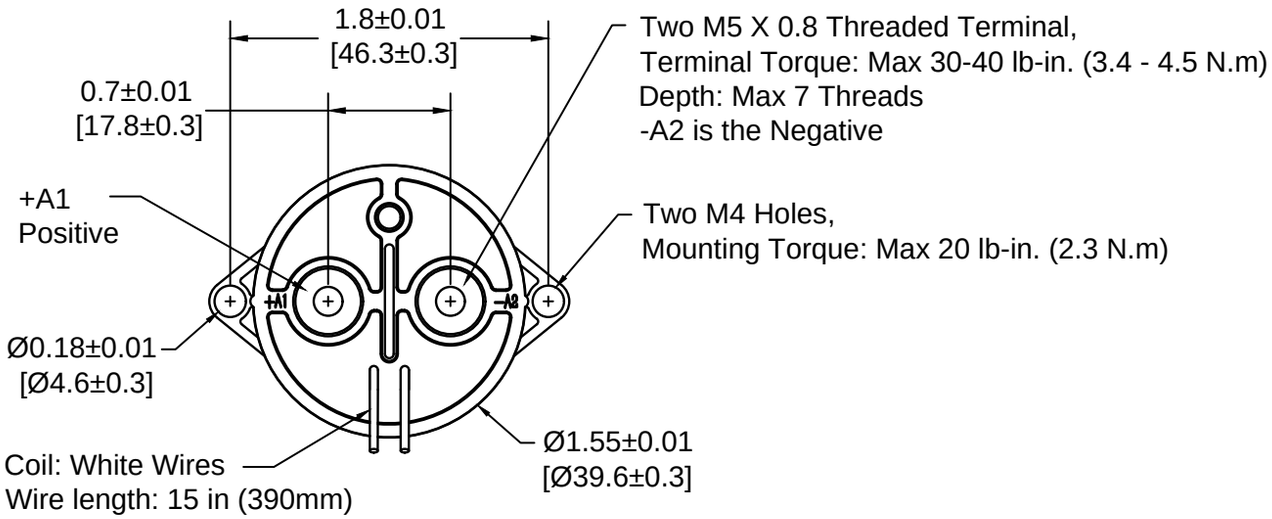
COIL DATA		
Voltage rating	12Vdc	24Vdc
Pickup voltage (25˚C)	8Vdc	18Vdc
Dropout voltage (25˚C)	1.2Vdc	2.4Vdc
Max Pickup voltage (85˚C)	9.6Vdc	19Vdc
Rated coil resistance±5% (25˚C)	25Ω	92Ω
Coil current (25˚C)	480mA	260mA
Coil watts (25˚C)	6.0W	6.0W

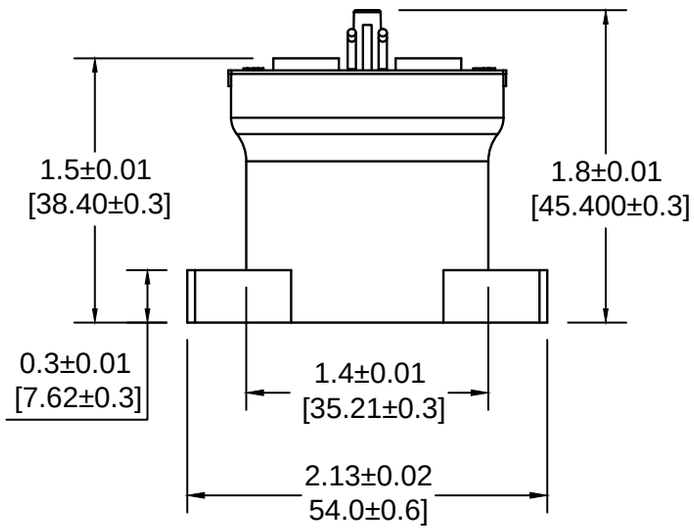
*1: Current is relevant to the cross-sectional area of conductor.

*2: Ambient temperature: +40˚C, 3 minutes

ASEV30 Series DC Contactor Specification

Outline Dimensions: inches (mm)





ASEV30 Series DC Contactor Specification

Application Note:

1. Be sure to use washer to prevent screws from loosening, all the terminals or copper bar must be in direct contact with the contactor's terminals. Screw tightening torque is specified below. Exceeding the maximum torque can lead to product failure.
   - Contact torque: 30 - 40 lb.in (3.4 - 4.5 N.m) Max. Active length of thread is 7.0 mm
   - Mounting torque: 20 lb.in (2.3 N.m)
2. Contact terminals are polarized so refer to drawing during connecting. We suggest using a varistor rather than diode as a surge protector.
3. Do not use if dropped.
4. Avoid installing in a strong magnetic field (close to a transformer or magnet), or near a heat source.
5. Electrical life
   Use per load capability and life cycle limits so as not to cause a function failure (treat the contactor as a product with specified life and replace it when necessary). It is possible to make parts burn around the contactor once operating failure occurs. It is necessary to take layout into account and to make sure power shall be cut off within 1 second.
6. Lifetime of internal gas diffusion
   The contactor is sealed and filled with gas, lifetime of gas diffusion is determined by temperature in contact chamber (ambient temperature + temperature generated by contact operation). Operate only in an ambient temperature from -40 to +85 ˚C.
7. Drive power must be greater than coil power or it will reduce performance capability.
8. Avoid debris or oil contamination on the main terminals to optimize contact and avoid excess heat generation.
9. After continuous rated voltage / current has been applied to the coil and contacts, turning off the coil and immediately re-energizing the coil will result in a higher pick-up voltage than the rated value. This is due to increased coil resistance (coil temperature rise) of the device.

ALEV50 Series DC Contactor Specification

ALTRAN MAGNETICS

Application

- Power supply / motor control, circuit insulation, circuit protection and safety devices for industrial machinery
- Charging pill, Electric vehicle etc.

Features

HIGH CURRENT AND HIGH VOLTAGE
Nitrogen sealed contacts to minimize arcing, up to 750VDC load is available.

COMPACT STRUCTURE, LOW NOISE
Contact design yields reduced unit size, low noise while carrying or switching current.

HIGH SAFETY
There is no arc leakage due to tight sealing.

HIGH CONTACT RELIABILITY
Stable contact resistance no matter how harsh the environment with sealed contacts

NO SPECIAL MOUNTING REQUIREMENT
Light weight actuator is less impacted by gravity with no special mounting orientation requirements.

VARIOUS APPLICATIONS
Application includes battery switch and standby equipment, DC power control, circuit protection, etc.

OPTIONAL AUXILIARY CONTACT
Allows for contact position signal.

AEV150 Series DC Contactor Specification

ALTRAN MAGNETICS

Application

AEV150 series DC contactors are used for battery power supply, DC power control, circuit protection and other electric vehicle power switch controls. Can also be used in uninterruptible power supply and other electronic control systems.

Features

HIGH CURRENT AND HIGH VOLTAGE
Nitrogen sealed contacts to minimize arcing.

COMPACT STRUCTURE, LOW NOISE
Contact design yields reduced unit size, low noise while carrying or switching currents.

COIL ECONOMIZER
Built-in coil economizer – only 1.7W holding power @12VDC, limits back EMF to 0V.

HIGH SAFETY
There is no arc leakage due to tight sealing.

HIGH CONTACT RELIABILITY
Stable contact resistance no matter how harsh the environment with sealed contacts.

NO SPECIAL MOUNTING REQUIREMENT
Light weight actuator is less impacted by gravity with no special mounting orientation requirements.

VARIOUS APPLICATIONS
Application includes battery switch and standby equipment, DC power control, circuit protection, etc.

OPTIONAL AUXILIARY CONTACT
Allows for contact position signal.

AEV150 Series DC Contactor Specification

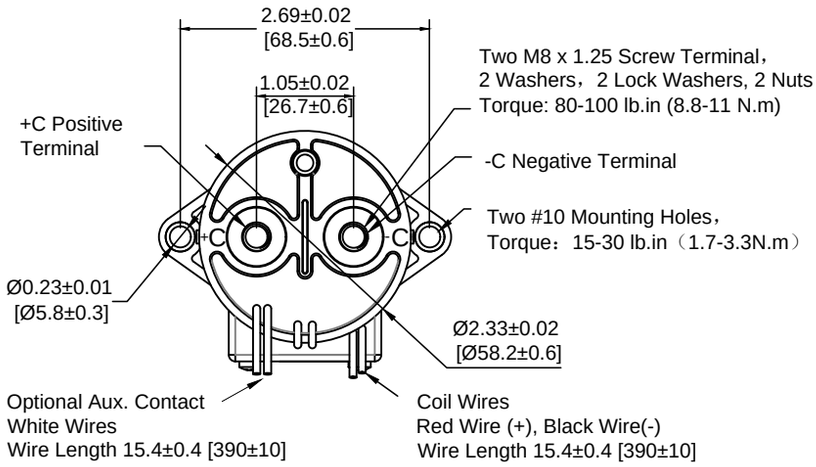
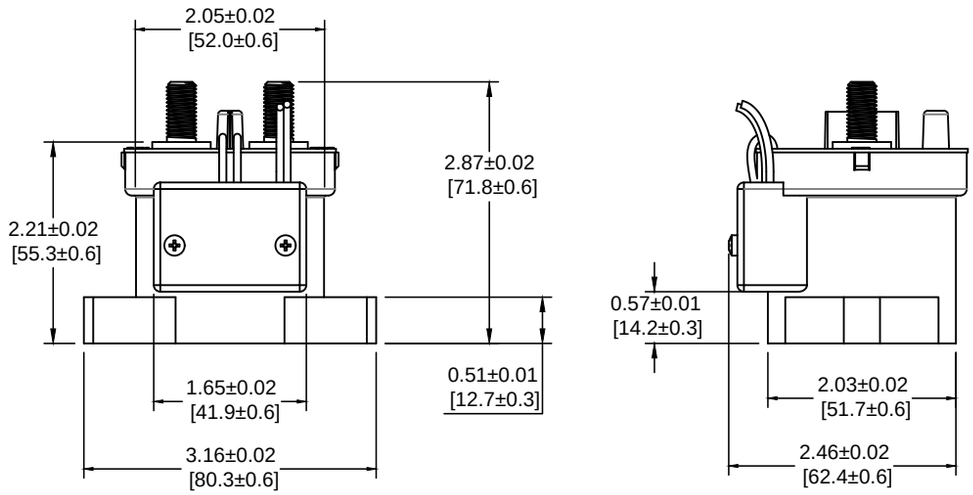
Outline Dimensions: in. (mm)





AEV150 Series DC Contactor Specification

Application Note:

1. Be sure to use washer to prevent screws from loosening. Screw tightening torque range is specified as below. Exceeding the maximum torque can lead to product failure.
   - Contact torque (M8): 80 - 100 lb.in (8.8 - 11 N.m)
   - Mounting torque: 15 - 30 lb.in (1.7 - 3.3 N.m)
2. Contact Terminals are polarized so refer to drawing during connecting. There is a reverse surge absorption circuit so that it is not necessary to use a surge protective device.
3. Do not use if dropped.
4. Avoid installing in a strong magnetic field (close to a transformer or magnet), or near a heat source.
5. Electrical life
   Use per load capability and life cycle limits so as not to cause a failure. (treat the contactor as a product with specified life and replace it when necessary). It is possible to make parts burn around the contactor once operating failure occurs. It is necessary to take layout considerations into account and to make sure power shall be cut off within 1 second.
6. Lifetime of internal gas diffusion
   The contactor is sealed and filled with gas, lifetime of gas diffusion is determined by temperature in contact chamber (ambient temperature + temperature generated by contact operation). Operate only in an ambient temperature from -40 to +85 ˚C.
7. If inductive load(L/R>1ms) then a surge current protection device should be connected in parallel to the inductive load.
8. Drive power must be greater than coil power or it will reduce performance capability.
9. Avoid debris or oil contamination of the main terminals to optimize contact and avoid excess heat generation.
10. Unit operates after power applied for 0.1s, do not rapidily switch unit.

AEVT150 Series DC Contactor Specification

ALTRAN MAGNETICS

Application

AEVT150 series DC contactor is used for electric vehicle, hybrid electric vehicle, renewable energy storage, battery charging and fuel battery, solar energy battery, general industrial equipment.

Features

HIGH CURRENT AND HIGH VOLTAGE
Utilizing a magnetic arc blow-out design in combination with ceramic sealed / inert gas filled contact chamber allows it to make/break 1500A/450Vdc.

COMPACT STRUCTURE, LOW NOISE
Contact design yields reduced unit size, low noise while carrying and switching current.

HIGH SAFETY
There is no arc leakage due to tight sealing.

HIGH RELIABLE CONTACT
Stable contact resistance no matter how harsh the environment with sealed contacts.

NO SPECIAL REQUIREMENT FOR MOUNTING
Light weight actuator is less impacted by gravity with no special mounting orientation requirements. Side mounting and bottom mount styles are available.

VARIOUS APPLICATION
Application includes battery switch and standby equipment, DC power control, circuit protection, etc.

"T" = Threaded Coil Terminal (not available with Aux contact)

ALEV200 Series DC Contactor Specification

Performance Data

MAIN CONTACT		LIFE	
Contact Arrangement	1 Form X (SPST-NO, DM)	200A @ 450VDC	5000 Cycles
Operating Voltage	12-900vdc	Mechanical Life	200,000 Cycles
Rated Current	200A	**AUX. CONTACT**	
Maximum short circuit current	2,000A@320vdc 1 cycle	Aux. Contact arrangement	1 Form A
Withstand Voltage *1	Between open contacts: 4,000 VDC, ≤ 1mA Between contact and coil: 2,500VAC, ≤ 1mA	Aux. Contact Current Max	2A@30VDC/ 3A@125VAC
Insulation Resistance*1	Terminal to Terminal /Terminal to Coil New product: Minimum 100 MΩ @500vdc	Aux. Contact Current Min	100mA@8V
		Aux. Contact Resistance	0.417 ohms @320VDC 0.150 ohms @125VAC
Voltage Drop (@200A)	≤80mV		
ENVIRONMENTAL DATA		**OPERATE / RELEASE TIME**	
Shock, 11ms ½ Sine, Operating	20G Peak	Close (not including bounce)	30ms, Max. @20°C
Vibration, Sine, Peak, 20G	80—2,000Hz	Release Time	12ms, Max. @20°C
Operating Temperature	-40 to +85˚C		
Weight	1.32 lb. (0.60 kg)		

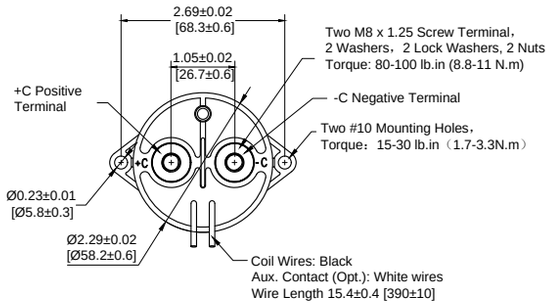
COIL DATA				
Voltage Rating	**12 Vdc**	**24 Vdc**	**48 Vdc**	**72 Vdc**
Voltage (Max.)	15 Vdc	30 Vdc	60 Vdc	90 Vdc
Pick-up Voltage (20 ˚C)	9.0 Vdc	19.0 Vdc	38.0 Vdc	57.0 Vdc
Drop-out Voltage (20 ˚C)	0.5 - 4.0 Vdc	1.0 - 6.0 Vdc	3.0 - 10.0 Vdc	4.0 - 14.0 Vdc
Coil Current (20˚C, Nominal Voltage)	1.1A	0.6A	0.3A	0.2A
Rated Coil Resistance±5% (20˚C)	11 Ω	40 Ω	145 Ω	357 Ω

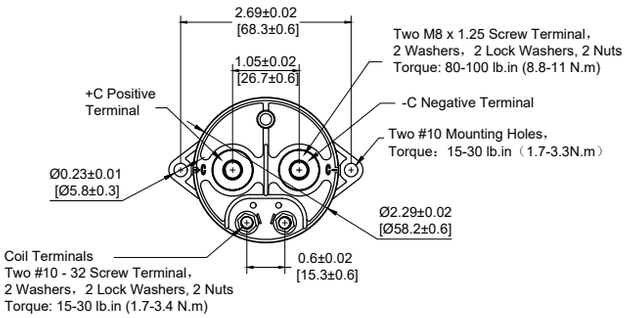
Note:
*1: Does not meet Dielectric & IR after test.

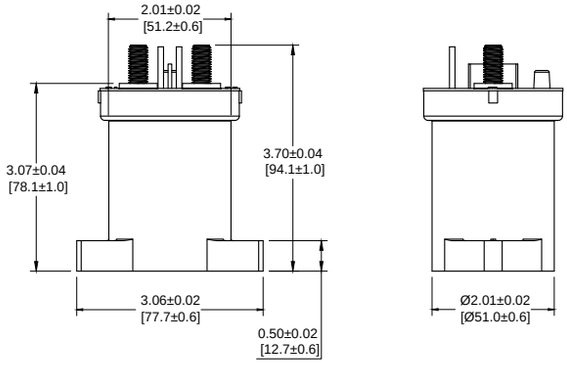
ALEV200 Series DC Contactor Specification

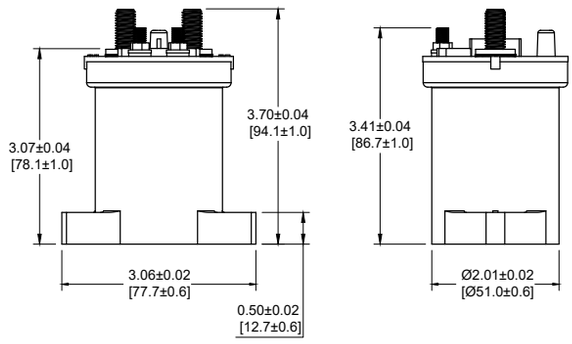
Outline Dimensions : inches (mm)

A. Bottom mount:

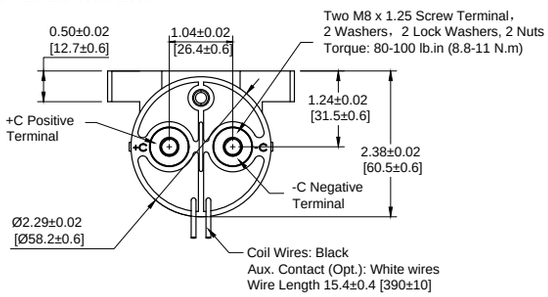


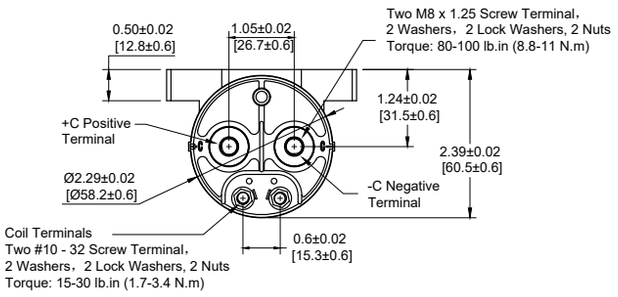


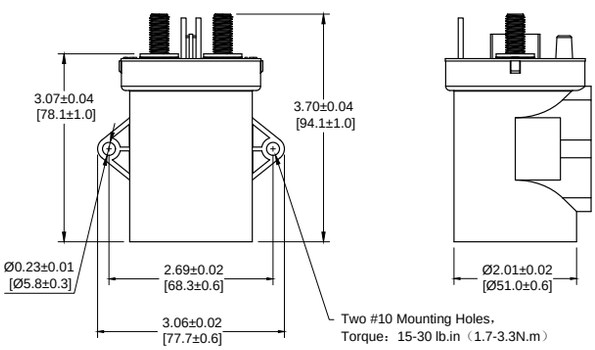


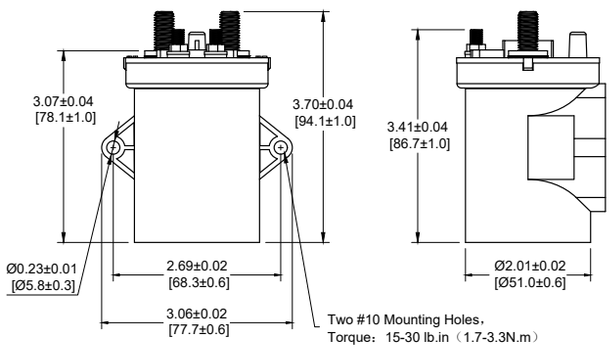


B. Side mount:









Note:
When stud terminals are specified for coil connections, the electrical connection is made at the base of the stud.

ALEV200 Series DC Contactor Specification

Application Note:

1. Be sure to use washer to prevent screws from loosening, all the terminals or copper bar must be in direct contact with the contactor's terminals. Screw tightening torque is specified below. Exceeding the maximum torque can lead to product failure.
   - Contact torque (M8): 80 - 100 lb.in (8.8 - 11 N.m)
   - Mounting torque: 15 - 30 lb.in (1.7 - 3.3 N.m)
2. Contact terminals are polarized so refer to drawing during connecting. We suggest using a varistor rather than diode as a surge protector.
3. Do not use if dropped.
4. Avoid installing in a strong magnetic field (close to a transformer or magnet), or near a heat source.
5. Electrical life:
   Use per load capability and life cycle limits so as not to cause a function failure (treat the contactor as a product with specified life and replace it when necessary). It is possible to make parts burn around the contactor once operating failure occurs. It is necessary to take layout into account and to make sure power shall be cut off within 1 second.
6. Lifetime of internal gas diffusion The contactor is sealed and filled with gas, lifetime of gas diffusion is determined by temperature in contact chamber (ambient temperature + temperature generated by contact operation). Operate only in an ambient temperature from -40 to +85 ˚C.
7. Drive power must be greater than coil power or it will reduce performance capability.
8. Avoid debris or oil contamination on the main terminals to optimize contact and avoid excess heat generation.
9. After continuous rated voltage / current has been applied to the coil and contacts, turning off the coil and immediately re-energizing the coil will result in a higher pick-up voltage than the rated value. This is due to increased coil resistance (coil temperature rise) of the device.

AEV250 Series DC Contactor Specification

ALTRAN MAGNETICS

Application

AEV250 Series is used for charging (pile) station, battery power supply, DC power control, circuit protection and other electric vehicle power switch controls. Also it could be widely used in uninterruptible power supply and other electronic control systems.

Features

HIGH CURRENT AND HIGH VOLTAGE
Contact chamber is filed with inert gas to minimize arcing, up to 900VDC load is available.

COMPACT STRUCTURE, LOW NOISE
Contact design yields reduced unit size, low noise while carrying or switching currents.

COIL ECONOMIZER
Built-in coil economizer – only 1.7W hold power @12VDC and it limits back EMF to 0V.

HIGH SAFETY
There is no arc leakage due to tight sealing.

HIGH RELIABLE CONTACT
Stable contact resistance no matter how harsh environment with sealed contacts.

NO SPECIAL REQUIREMENT FOR MOUNTING
Light weight actuator is less impacted by gravity with no special mounting orientation requirements.

VARIOUS APPLICATION
Application includes battery switch and standby equipment, DC power control, circuit protection, etc.

COMPLY WITH EU ROHS DIRECTIVE (2011/65/EU)

Nomenclauture

Example	AEV250	–	M	AN

Series code:
"AEV250" = AEV250 Series

Coil Voltage Code::
"M" = 12 - 24 VDC
"F" = 72 VDC
"G" = 48 - 72 VDC

Options (applied in this order):
Blank = Std. Options (Bottom Mount, Without Aux. Contact & Polarized Load Terminals)
"A" = With Aux. Contact (SPST-NO)
"B" = With Aux. Contact (SPST-NC)
"N" = Non-Polar Load Terminals
"P" = Potted PCB

AEV250 Series DC Contactor Specification

Performance Data

MAIN CONTACT		LIFE	
Contact arrangement	1 Form X (SPST-NO DM)	Resistive load life	See chart below
Rated Operating Voltage	12-900VDC	Mechanical life	200,000 cycles
Continuous (Carry) Current	250A (65˚C) *2	**AUX. CONTACT**	
Max short circuit current	2,000A @320VDC, 1 cycle*1	Aux. Contact arrangement	1 Form A, 1 Form B
Dielectric Withstanding Voltage	2200Vrms (leakage <1mA)	Aux. Contact Current Max	2A@30VDC/ 3A@125VAC
Insulation Resistance	Terminal to Terminal/ Terminal to coil New: Min 100 MΩ@500Vdc End of life: Min 50 MΩ@500Vdc	Aux. Contact Current Min	100mA@8V
Voltage Drop (@250A)	≤50mV	Aux. Contact Resistance Max	0.417ohms@30VDC/ 0.150ohms @125VAC
ENVIRONMENTAL DATA		**OPERATE / RELEASE TIME**	
Shock,11ms ½ sine, operating	20G Peak	Close (includes bounce)	25ms, Max.
Vibration, Sine, Peak, 20G	80 to 2,000Hz	Release (@2000A includes arc)	12ms, Max
Operating Ambient Temperature	-40 to +85˚C		
Altitude	<4000m		
Weight	0.95 Lb (0.43 kg)		
COIL DATA			
Coil Voltage	12 - 24VDC	72VDC	48 - 72VDC
Voltage (Max.)	36VDC	95VDC	95VDC
Pickup voltage (Max.)	9VDC	48VDC	32VDC
Dropout voltage (Min.)	6VDC	27VDC	18VDC
Inrush Current (Max.)	3.8A	0.7A	1.3A
Holding Current (Avg.)	0.13A@12VDC / 0.07A@24VDC	0.02A@72VDC	0.03A@48VDC

Note:

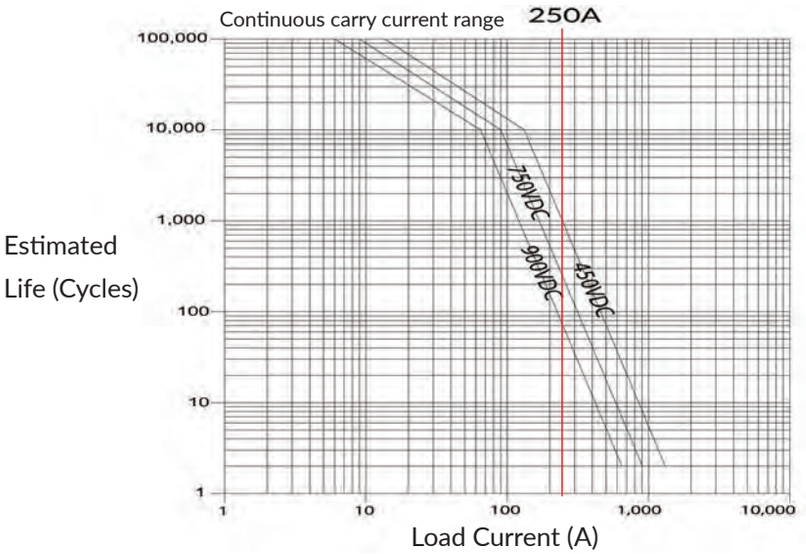
*1: Does not meet dielectric & IR after test.

*2: Higher currents are possible but are relevant to cross-sectional area of conductor.

AEV250 Series DC Contactor Specification

Electrical life

Estimated Make & Break Resistive Load Ratings for polarized type



Note:

Estimates based on extrapolated data. User is encouraged to confirm performance in application.

Estimated Electrical Life: Polarity Sensitive Type

Voltage (V)	450	650
Current (A)	250	250
Life (Cycle)	5000	500

Estimated Electrical Life: Non-Polarity Sensitive Type

Voltage (V)	450	650
Current (A)	250	250
Life (Cycle)	2000	500

Polar type electrical Load Life Ratings for Typical EV Applications

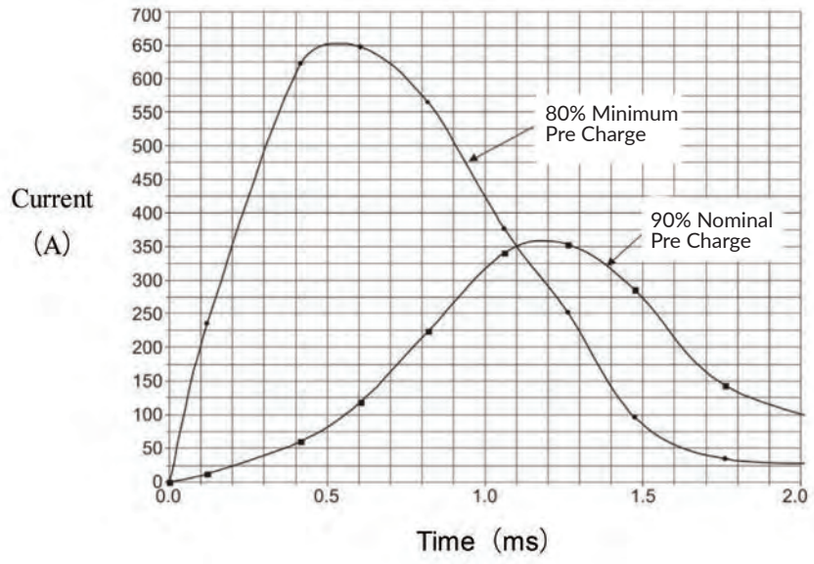
MAKE/BREAK LIFE CAPACITIVE & RESISTIVE LOADS AT 320VDC*1	
@90% pre-charge (make only), see chart below	50,000 cycles
@Min 80% pre-charge (make only), see chart below	50 cycles

Note:

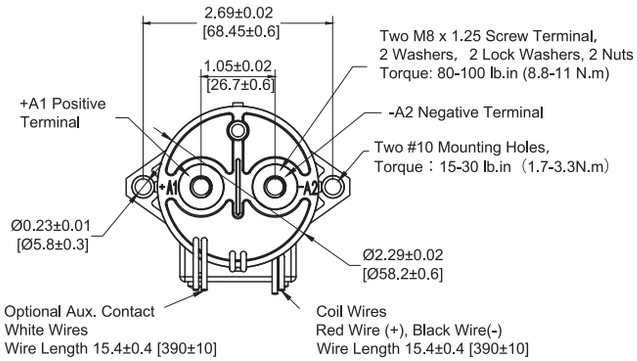
*1: Resistive load includes L=25uH. Load @2500A, test @200uH

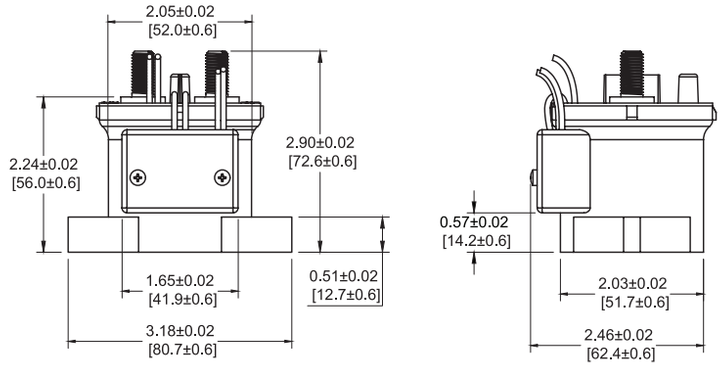
AEV250 Series DC Contactor Specification

AEV250 Capacitive Make Test Curves for Pre-Charged Motor Controller



Outline Dimensions: in. (mm)





Note:

No Polarity mark on non-polarity “N” type

AEV250 Series DC Contactor Specification

Application Note:

1. Be sure to use washer to prevent screws from loosening. Tighten the screw torque range is specified as below. Exceeding the maximum torque can lead to product rupture.
   - Contact torque (M8): 80 - 100 lb.in (8.8 - 11 N.m)
   - Mounting torque: 15 - 30 lb.in (1.7 - 3.3 N.m)
2. Please refer to drawing for polarity sensitive type during connecting; No orientation for non-polar type.
3. Do not use dropped products.
4. Avoid to install the product in a strong magnetic field (Close to the transformer or magnet), or near an object with heat radiation.
5. Electrical life
   Please use under load capability and life cycle so as not to cause a function failure. (Please also treat the contactor as a product with specified life and replace it when necessary). It is possible to make parts burn around the contactor once operating failure happens. So it is necessary to take layout into account to make sure power shall be cut off within 1 second.
6. Lifetime of internal gas diffusion
   The contactor is sealed and filled with gas, lifetime of gas diffusion is determined by temperature in contact chamber (Ambient temperature + Temperature rising by contact energizing). Therefore environment temperature should be from -40 to +85˚C.
7. Do not let particle and oil stain on the main terminal with which the load shall make a reliable contact. Or it will cause a lot of heat.

AEVT350 Series DC Contactor Specification

ALTRAN MAGNETICS

Application

- Operating voltage range: 12-1,800VDC, continuous 350A, break current of 2,300A
- Ideal for Circuit protection, control, battery switch and main power break, etc.
- Built-in coil economizer:
  - Holding power @4W with no limitation of temperature and voltage
  - EMI spectrum has been tested and approved
  - Built-in coil suppression
- Hermetically Sealed contact chamber to protect all moving parts
- Able to handle harsh environments
- Provided with sealed control wire connector

Product Facts

- Versatile power, voltage, and current operating range: 12-1800 Vdc;
- Excellent for safety disconnect and transfer switch applications;
- Built-in dual power coil economizer, 8w holding typical
- Hermetically “Super-sealed” environment uniquely protects contacts and all moving parts;
  can operate in harsh environment
- Auxiliary contacts optional
- 360KW power switch capable
