

## Rebling Datasheet: 250 amp Top Seal Lithium Battery Terminal

The 250 amp Top Seal Terminal uses the same nickel-plated brass conductor, accepts the same rigid and flexible covers and has the same performance characteristics as Rebling's 250 amp SFT-style feed-through terminal. This terminal is intended for lithium battery OEMs which are packaging their cell packs inside molded plastic or aluminum cases that are 1 to 20 times the size of an automotive starter battery. The Top Seal Terminal enables the OEM to attach the terminal to the lithium cell pack first, place the cell pack into the battery case, place the lid onto the battery case (allowing the terminals to poke through clearance holes in the lid), attach the lid to the terminals with flat-head sheet metal screws then screw, glue or weld the battery lid to the battery case. The Top Seal Terminal reduces the amount of labor and eliminates two cables which the OEM previously used to attach the terminals. The Top Seal is intended for OEMs which are graduating from producing hundreds of batteries per year to tens or hundreds of thousands per year. The "Arc of Forgiveness" feature allows the terminal to be mis-rotated by 30 degrees and still align with the screw holes in the battery lid. It also includes an "Orientation Key" feature which high precision OEMs can use to aid in alignment.

## Electrical

**Current** each current profile causes a max 30° C temperature rise when tested per IEC 61984

Current Profile #1	Continuous Rated Current (CRC) -----			250 amps
Current Profile #2	50% CRC for 60min	+ 1 sec peak	+ 50% CRC for 60 min	1,500 amps
Current Profile #3	50% CRC for 60min	+ 10 sec peak	+ 50% CRC for 60 min -----	1,000 amps
Current Profile #4	50% CRC for 60min	+ 30 sec peak	+ 50% CRC for 60 min	750 amps
Current Profile #5	50% CRC for 60min	+ 60 sec peak	+ 50% CRC for 60 min -----	500 amps

Application Notes

- 1. Watertight is superior to IP68: Rebling’s Top Seal terminal is not only IP68, it is watertight which is superior to any IP Rating. The definitions of IP67, IP68 and IP69k per IEC 60529 state that “water may penetrate the seal but shall do no harm”, a condition that is unacceptable to lithium battery designers.
- 2. Interchangeability of 250 amp and 500 amp Terminals: if you are uncertain whether your application needs a 250 amp or 500 amp Top Seal Terminal, not a problem; the mounting hole patterns for the 250 amp and 500 amp are identical.
- 3. Flat Head Mounting Screws:
